## About Us

Southwest Scaffolding specializes in the sales of scaffolding frames and accessories, Non-Stop elevated platform scaffolding, scaffolding planks and masonry equipment. We are located in the Dallas/Fort Worth Metroplex and sell scaffolding nationwide and in Canada.

### Sales

We sell new conventional scaffolding frames of all types and sizes. These include walk thru, ladder and half high frames. We also sell all needed accessories, wood planks and metal planks. We occasionally have used scaffolding and accessories for sale. In addition, we sell masonry equipment such as mixers and saws. Please note that prices do not include shipping. Please contact us for shipping quotes. Sales are subject to sales tax. If you don't see what you need, we can get it for you!

### Rentals

We rent Non-Stop Scaffolding and associated planks and accessories. Our rental rates are competitive and dependent on the amount rented so give us a call for a quote on your next job. We will arrange shipping on all projects and supply an estimate. The larger the rental, the more economical it is to ship long distances. We have shipped as far as 1,000 miles away. We have thousands of feet of Non-Stop scaffolding inventory so we can service jobs both large and small. We typically do not rent frame scaffolding unless large quantities are needed.

### Scaffolding Services

After spending more than 20 years in the masonry business, we have the knowledge and expertise to meet your masonry scaffolding needs. Our services include: on site training and assistance in design and layout of scaffolding, OSHA compliance training. Our staff includes knowledgeable field representatives, who have years of first-hand experience in the erection and use of our scaffolding systems. The biggest factor in profitability on a masonry job is efficient use of labor. Let us help you use your labor efficiently by designing a scaffolding plan for your job.

## Scaffolding Rental Service in Dallas/Fort Worth

### Request a Scaffolding Rental Quote or call us at 972.331.1094

At Southwest Scaffolding our scaffolding rental includes frame scaffolding, scaffold boards, scaffolding accessories, and Non-Stop scaffolding. We typically rent scaffolding on medium to large projects. We are not set up to rent on small projects.

### Rent Frame Scaffolding (Large Project Bulk Rental)

Our frame scaffolding is used for larger exterior and interior construction projects. We offer bulk rental for large project for both ladder and walk-through frames depending on your needs. Our frame scaffolding is rented by the set. Each set comes with two frames, two 7' cross braces and four pins and one 7' aluminum walkboard.

### Rent Non-Stop Scaffolding

Non-Stop Scaffolding is an elevated-platform scaffolding that uses a single platform. The platform height can be adjusted by using winches to crank it up and down the scaffolding towers. This scaffolding is often used by masonry contractors on medium to large masonry projects. Contact us for pricing. We will need to know how long the platform needs to be and how high you need to go.

MAN BASKET FOR FORKLIFT RENTAL  
\$500.00

TRASH HOPPER FOR FORKLIFT RENTAL  
\$500.00

WALL BRACES FOR RENT IN VARIOUS LENGTHS  
\$25.00-\$35.00

### Other Items for Rent

### Delivery and Installation

We provide both delivery/pickup services and installation services for an additional price. Be sure to mention you need a price for these in your quote request.

### Training

We provide OSHA safety training and scaffolding use training classes.

## EZ Grout Hog Products

Grout work is the name of the game with this company, and they truly make it easy. EZ Grout is a state of the art fabrication and design shop located in Southeastern Ohio. New, cutting edge technology makes these grout mixers and delivery systems easy to clean and use, extremely versatile, and durable enough for any job. These machines are capable of sitting on the ground, being lifted by a fork lift, or overhung by a crane. Available in gas or hydraulic models, these machines easily adapt to your current lineup of construction equipment. Need to get some height but don't have a forklift or crane to bring the delivery system up? No problem. We carry leg extensions as well as a model specifically designed for uphill use.

SWS-OTGP

Several Planking Options for Any Type of Job.

- A. Laborers' platform supports five 16-foot boards.
- B. Masons' outriggers are available to support up to five boards.
- C. Three boards form a standard workbench in the open bays.
- D. Built-in hop-board outriggers can be used to extend the workbench.

The Non-Stop Overhead Protection System can be used to provide a simple winter enclosure. The overhead beam telescopes to extend up to 10" behind the face of the wall. The system attaches securely to the elevating carriage, and the x-braces need not be removed and replaced. All parts are captured, and the beam does not have to be threaded on from the top. Installation is a breeze! Plus, all components serve both right and left-hand elevating carriages. It is a cost-effective solution when a covering is needed for 2 to 4 months.

**SWS-RBKT**  
NON-STOP HEAVY DUTY  
RACK BRACKETS  
WT. 75 LBS

**SWS-PBASKET**  
NON-STOP HEAVY DUTY  
PARTS BASKETS  
WT. 315 LBS

Rack brackets are the fastest and simplest way to move Heavy-Duty scaffolding from job to job. Rack brackets secure up to 10 fully assembled towers in a rigid 48"-wide bundle. Using rack brackets, up to 20 assembled towers can be hauled side-by-side on any standard 8'-wide trailer. The diagram shows how 10 towers, 18' tall form a bundle only 20' in length. Towers assembled 27' tall form a bundle less than 30' in overall length. Using rack brackets, 133 running feet of scaffold can be unloaded from a trailer in under 3 minutes, putting you on the wall faster.

Parts baskets are another accessory our customers LOVE. They keep all your small parts in one container, instead of all over the job site (or the highway!).

By adding a simple Guardrail Kit (SWS-PBG), you can even use it for a legal man basket.
