Welcome to Southwest Scaffolding, A Nationwide Scaffolding and Equipment Company

Southwest Scaffolding specializes in the sales of scaffolding frames and accessories, Non-Stop elevated platform scaffolding, scaffolding planks and masonry equipment. We are located in the Dallas/Fort Worth Metroplex and sell scaffolding nationwide and in Canada.

Sales
We sell new conventional scaffolding frames of all types and sizes. These include walk thru, ladder and half high frames. We also sell all needed accessories, wood planks and metal planks. We occasionally have used scaffolding and accessories for sale. In addition, we sell masonry equipment such as mixers and saws. Please note that prices do not include shipping. Please contact us for shipping quotes. Sales are subject to sales tax. If you don’t see what you need, we can get it for you!

Rentals
We rent Non-Stop Scaffolding and associated planks, hydraulic scaffolding, and accessories. Our rental rates are competitive and dependent on the amount rented so give us a call for a quote on your next job. We will arrange shipping on all projects and supply an estimate. The larger the rental, the more economical it is to ship long distances. We have shipped as far as 1,000 miles away. We have thousands of feet of Non-Stop scaffolding inventory so we can service jobs both large and small. We typically do not rent frame scaffolding unless large quantities are needed.

Scaffolding Services
After spending more than 20 years in the masonry business, we have the knowledge and expertise to meet your masonry scaffolding needs. Our services include: on site training and assistance in design and layout of scaffolding, OSHA compliance training. Our staff includes knowledgeable field representatives, who have years of first-hand experience in the erection and use of our scaffolding systems. The biggest factor in profitability on a masonry job is efficient use of labor. Let us help you use your labor efficiently by designing a scaffolding plan for your job.

NON-STOP HEAVY DUTY
INSIDE CORNER BRACKET
WT. 46 LBS
Several Planking Options for Any Type of Job.
A. Laborers' platform supports five 16-foot boards.
B. Masons' outriggers are available to support up to five boards.
C. Three boards form a standard workbench in the open bays.
D. Built-in hop-board outriggers can be used to extend the workbench.

The Non-Stop Overhead Protection System can be used to provide a simple winter enclosure. The overhead beam telescopes to extend up to 10'' behind the face of the wall. The system attaches securely to the elevating carriage, and the x-braces need not be removed and replaced. All parts are captured, and the beam does not have to be threaded on from the top. Installation is a breeze! Plus, all components serve both right and left-hand elevating carriages. It is a cost-effective solution when a covering is needed for 2 to 4 months.

Parts baskets are another accessory our customers LOVE. They keep all your small parts in one container, instead of all over the job site (or the highway!).

By adding a simple Guardrail Kit (SWS-PBG), you can even use it for a legal man basket.
New Non-Stop Standard-Duty Elevating Scaffolding
The first and only adjustable scaffolding that makes you money on walls ONLY 6 FEET HIGH!

Grout work is the name of the game with this company, and they truly make it easy. EZ Grout is a state of the art fabrication and design shop located in Southeastern Ohio. New, cutting edge technology makes these grout mixers and delivery systems easy to clean and use, extremely versatile, and durable enough for any job. These machines are capable of sitting on the ground, being lifted by a fork lift, or overhung by a crane. Available in gas or hydraulic models, these machines easily adapt to your current lineup of construction equipment. Need to get some height but don’t have a forklift or crane to bring the delivery system up? No problem. We carry leg extensions as well as a model specifically designed for uphill use.
